[1] 〈Akina, Hayato and Mr. Lee are talking.〉

Akina : We learned about \*senior citizens in our home economics class today. Many senior citizens are working in Japan.

Mr. Lee : Really?  A A lot of senior citizens in Singapore are still working, too.

Hayato : I go to an English language school near my home and the teachers are all senior citizens. They're good at teaching English.

Akina : Oh, all your teachers are senior citizens?

Hayato : Yes, they're all \*retired. My favorite teacher was a pilot. He traveled around the world for thirty years!

Mr. Lee : That's cool!

Akina : We have to give a speech about senior citizens for our class next month, right? We should interview him.

Hayato : He will not be at the English language school this week, but I have another idea. Last week, when I went shopping, I saw many senior citizens who were walking around in the \*shopping mall. Let's ask them some questions!

Akina : Let's do it!

Mr. Lee : Oh, that's a good idea. By the way, I'm going to go to Singapore next week. I'll try to take a video there for you, so you can learn about the senior citizens in Singapore.

Hayato : Thanks! I hope you have fun!

[注] senior citizen……高齢者, お年寄り      retired……退職した  
shopping mall……ショッピングモール(大型のショッピングセンター)

ア It's easy for me.

イ It's too difficult.

ウ It's the same in my country.

エ It's different in my country.

2) <Next month, Akina gives a speech with Hayato to their classmates.>

Have you ever heard about "mall walking?" Mall walking is a special program that some shopping malls hold. In mall walking programs, people walk around in the shopping mall for their health. Many senior citizens join these programs. Most shopping malls are large and \*completely indoors. So, they ( ) about bad weather. Shopping malls also have food and drinks. We asked the \*manager of the shopping mall in our town about this program. He said he wanted to help people in the city and to build a \*community for the senior citizens to keep healthy. I think it's important for senior citizens to be happy and healthy, too. We interviewed some of the senior citizens in this program. We asked them, "What is good about this program?" Most of them said they felt healthier after walking in the shopping mall, and some others said they made friends or learned useful things. There were more people who said they felt healthier after mall walking than people who said they made friends or learned useful things.

問 3 Akina と Hayato がインタビューした結果を表したグラフとして最も適切なものを、次のア～エの中から1つ選び、その記号を書きなさい。(3点)

- 3 <Mr. Lee took a video in Singapore to show to his class. In the video, he talks about the senior citizens there.>

Hello, class! I'm in a big supermarket in Singapore now. There are a lot of workers here. About half of the people working in this supermarket are over fifty years old. The oldest worker here is eighty-two! That's amazing, right? I interviewed one of the workers here. His name is Ron. He says he is seventy-two years old now and has worked here for five years. He usually works five days a week. He can meet a lot of people, so he likes working at this supermarket. People in Singapore say that sixty is "the new forty" because people live longer now and continue to work. I've heard that, in Singapore, 25% of the people who are more than sixty-four years old are still working. I hope I can \*stay active like the workers here when I'm older.

[注] stay active……元氣げんきでいる

問 4 本文 3 の内容に関する次の質問に、英語で答えなさい。(4点)

Why does Ron like working at the supermarket?

- 4 <After class, Akina, Hayato and Mr. Lee are talking about the speech and video.>

Akina : I'm surprised that so many senior citizens in Singapore are still working.

Hayato : Me, too. I didn't know that there were so many senior citizens who were doing interesting activities in our city. I can't [ will / what / be / our / imagine / lives ] like when we're older.

Mr. Lee : You are still young, so you have a lot of time to think about your future. Are there any senior citizens you respect, Akina?

Akina : I really respect my grandmother. She teaches calligraphy to elementary school students at the community center in the city. She is very good at calligraphy. She is glad that she can teach many children. She loves her work very much.

Mr. Lee : That's great. People are living longer now, so I think it's important to keep happy and healthy even when we're older.

Mr. Lee : That’s a good idea. I’ll give it to you later.

- 3 次は、高校1年生の Kazuma が書いた文章です。これを読んで、問1～問6に答えなさい。\*印のついている語句には、本文のあとに〔注〕があります。(34点)

Japan is surrounded by the sea and has rich fishing grounds. There are over ninety thousand kinds of living things in the area of \*coral reefs, and they support many of these living things. Corals look like plants, but they are actually animals. Corals are also important for keeping sea water clean. Coral reefs can be homes for sea animals. Coral reefs cover only 0.2% of the sea, but support almost 25% of all living things in the sea. This [ by / we / living things / many / that / taking / save / means / can ] care of coral reefs, so it is very important to \*preserve them.

However, coral reefs are disappearing. There are several reasons. First, a kind of \*starfish that eats corals has suddenly increased. This kind of starfish appeared near the west sea of Okinawa in 1969, and almost all of the coral reefs in Okinawa were lost in about ten years because of the starfish. Next, \*red soil is sometimes washed into the sea because many parts of Okinawa have been developed since 1972. If coral reefs are  with red soil, it is hard for corals to grow. In 2011 in Okinawa, about 298,000,000 kg of red soil ran into the sea. Third, high water temperatures make corals sick. From 1997 to 1998, \*coral bleaching happened because of high water temperatures around the world. If water temperatures in summer stay 1°C higher than they usually are, corals start to turn white. This looks beautiful, but actually means that the corals are \*alive but are slowly . In those two years, about 16% of the coral reefs in the world were lost. Finally, people sometimes touch and break corals.

\*The Ministry of the Environment and several prefectures think of these situations as serious problems. Several \*measures to save coral reefs from these problems are necessary. For example, Okinawa Prefecture is trying to reduce the \*amount of red soil which runs into the sea and supports groups joining in this activity. Kagoshima Prefecture is trying to save coral reefs by using fences to stop water pollution. Of course, it is also important to think about \*sustainable tourism and to build \*relations between humans and coral reef \*ecosystems. Sometimes more than 3,500 people visit the marine area in Okinawa in one day. Some of these visitors touch or even break corals, so to stop problems like this, a \*law to save places plants and animals live in was made. More people are now interested in saving coral reefs.

People have also taken other measures. For example, \*fisheries cooperatives in some areas are trying to \*get rid of the starfish which eat corals, but this is very hard.  Also, the sea is very large, and there is not much we can do. So, the best thing that we can do is to \*concentrate on only a few areas. It is not easy to stop the starfish from increasing or to stop high water temperatures, so some people are also working to \*revive coral reefs by \*transplanting new corals in the sea. Fisheries cooperatives were afraid that the environment was getting worse and tried to find a new way to save coral reefs.  Three years later, they learned a better way to transplant corals, and after an \*airline company started to support the fisheries cooperative in the village, many divers helped them and started to transplant more corals.  People who cannot dive in the sea can also join the coral transplanting program. First, everyone in the program learns about coral reef ecosystems, and then puts coral \*fragments into blocks. After that, divers take the blocks and leave them in the sea. From 2004 to 2015, more than 5,000 coral fragments were transplanted in the sea by a transplanting group. Through these experiences, people can learn how coral reef ecosystems work.

I actually tried transplanting corals through this program with my family in Okinawa last summer. We put coral fragments into the blocks, and then local divers took them into the sea. I was glad to learn that many people were working hard to save the sea. I hope the coral fragments are growing well. Everyone should think about the environment. It may not sound like much, but I believe that even small efforts can bring big changes. If we can make an effort to save the environment, our future with the sea will be bright.

問 4 空欄 ① ~ ③ にあてはまる最も適切な文を、次のア~カの中から1つずつ選び、その記号を書きなさい。なお、同じ記号を2度以上使うことはありません。(各3点)

- ア In a village in Okinawa, the fisheries cooperative started to transplant corals in 1999.
- イ In 2004, more than fifteen companies joined this activity.
- ウ The activity was not supported by many people because they had to save these starfish.
- エ But this could be done without great trouble.
- オ And in those sea areas, coral reefs didn't need to be protected any more.
- カ This measure didn't do well because it was taken after the starfish began to increase.

問 5 本文の内容に関する次の質問に、英語で答えなさい。(4点)

Why was Kazuma glad when he joined the coral transplanting program last summer?

問 6 次の英文は、本文の内容をまとめたものです。次の( 1 )~( 3 )に適切な英語を、それぞれ2語で書きなさい。(各3点)

Kazuma visited Okinawa with his family and joined the coral transplanting program last summer. Then he wrote a report about the importance of coral reefs and protecting them. When he wrote the report, he learned why it is necessary to save coral reefs. For example, a lot of corals are ( 1 ) a kind of starfish. Red soil also runs into the sea and stops coral reefs from growing, and coral bleaching happens because of high water temperatures. To protect them, many measures have been taken. The program that Kazuma ( 2 ) in is also one of the measures. By transplanting corals, there will be more healthy corals in the sea and people who join this program can learn a lot about corals and the environment. Through this report, Kazuma wanted ( 3 ) think about the environment.
